Features

Stainless Steel Air Curtain

Air curtains come with a stainless steel outer casing.

The stainless steel air curtains are easy to clean and maintain.

With a uniquely designed wind flow baffle, it can produce wind in all directions, working well in various environments.

It can be operated either by remote control or at the touch of a button.

The stainless steel air curtain can safely run for 5,000 consecutive hours.

Stainless steel air curtain can be mounted to heights ranging from 2.5m for the 900, 1200, 3.m for the 1500 and up to 4m for the 1800 and 2000.

Application

Stainless steel air curtains can be used in many applications including cafeterias, bakeries, abattoirs, butcher shops, cold storage units, waiting rooms, restaurants, large stores, department stores, sports Centre's, food shops, electronics factories, museums and food processing plants.

AQIS approved air curtains require standard air speeds of more than 8 m/s at 900mm above the floor.

With the new stainless steel air curtains you are getting more than the required 8m/s at 900mm from the floor.
